Our Story

Who We Are?

The journey started in 1984 to compare
in the construction of commercial
development, buildings and irrigation
works, wherever time was given to
become a full service contractor
offering a range of services that cover
each step of the construction and
equipment installation process. With
our expertise in the field we handle the
largest projects which make us the
most reliable partner for our client.

Our strategy is based on a leading re-
new people and work environment
with the latest techniques and
equipment. Moreover we strive for a
higher degree of excellence to finish
each project on time and on budget.
Results make the most for us since that
means evaluating every situation,
optimizing the process and working
with the most skilled staff.

Our commitment to quality & safety
arrangements are first challenges with
risk management focus, strong network
partners and operational process skills.

With our experience this year we
qualified approval Contractor of
Ability we have been actively
participating in multiple construction
small form / long term projects in local
Arabia belonging to various business
clients relating to Civil, Mechanical,
Electrical instrumentation,
industrial facilities, (Structural, Pipeline,
Structural Works, infrastructure, and all
other construction fields.

President Message

As President of Pars/Pakht Offshore Contracting Company, I am pleased to present our company, which has 8 years of experience as a general Contractor, Contractor, and operator in the Construction of your Projects. Our excellent reputation is largely due to the wide range of Ongoing & Projects Completed built with pride and success that our construction continues to use Today Pars/Pakht Offshore provides its activities in various sectors of the construction industry and continues steadily to business model. Our satisfaction being paramount, everything we produce is of excellent quality, and we can adapt our activities to various management models. Our Advantages

What set us apart?

Modern vision with
inherent legacies.

Outstanding and
sustainable results.

Customer-focused
solutions.

Lean, family
solutions.

Our Services

1. Site Development & Infrastructure works.
2. Site Preparation & Temporary Facilities.
3. Pipelines systems (CS, RTR)

Site Development & Infrastructure Works.

We build to lead with our capabilities and expertise in civil and infrastructure projects.

Our modern equipment allows us to execute various projects from earthwork, deep excavations and ground structure improvements, to complex below grade and various public way infrastructure.

Our concrete team has worked year after year to deliver excellent concrete projects in Saudi Arabia and that gives us greater control over quality, schedule and cost.

By investing in technologies, we compete in optimizing timelines and delivering the best values with the highest standards of safety in the industry.

Site Preparation & Temporary Facilities

It's a critical step for defining the conditions and time of construction since managing the site preparation activities and setting everything at its right place makes the process goes smoother and minimizes the impact of the construction work on the surrounding environment.

Our team aims to prepare a safe and proper site through all its stages, from clearing, surveying, soil testing, plan design and site investigation.

Safety is our first priority, that is backed by our rich resources for temporary facilities from site barriers to electricity to begin immediately an installation.

Pipeline systems (CB, RTA)

With our flexible pipeline systems for high pressure, we guarantee our pipelines laid under the most difficult environmental conditions.

Our skilled staff uses cutting edge pipeline systems to deliver top performance for liquid, gas, and steam projects (both above- and belowground).

CB and RTA pipeline systems play a main role in our projects to meet our clients' needs with its benefits - wide availability, and a wide variety of connection types and fittings.

These systems must be carefully planned to ensure the safety and integrity of the new pipeline and then executed to meet construction schedules and weather conditions.

QUALITY POLICY

ICI is committed to provide superior standard of service to the customers, by maintaining the professional practice and the quality of construction services.

Quality and continuous development are our basic operating principles. The effectiveness of management system is continually improved. Quality objectives and goals for continuous improvements are established. The overall objective of the quality system is to fully understand all the requirements of our customers and consistently to meet or exceed those requirements.

Quality is the responsibility of every ICI Employee. Employees are required to familiarize themselves with the quality documentation and implement all policies and procedures in their work to the best of their abilities. ICI is committed to full compliance to all requirements of the ISO 9001:2015.

HEALTH, SAFETY & ENVIRONMENTAL POLICY

FLUKE FLH&E SOLUTIONS CONTRACTING COMPANY

is committed to the standards, demands and expectations of customers and government regarding Safety, Health & Quality aspects.

Undertaking our activities goes along with high responsibility, competency, and professionalism, in order to realize our commitment and maintain our leadership position in this business we have established a structure that includes all the organization's activities and describes the processes, including the aspects of Safety, Health, and Quality. Our policy is established on the following items:

We operate our workplaces to comply with Quality Health & Safety applicable local and global regulations, and with the policies of our group using best practice as a guideline.

We will ensure that the risks associated with our activities and services to employers and other interested parties, surroundings, and the information and goods entrusted to us are limited and controlled in a responsible manner.

never moment is necessary

We will maintain the best possible Health, Safety performance, and to achieve this standard, prevent occupational injuries, illnesses, and pollution. We will establish, implement, and maintain a framework to measure our OHS objectives and targets and to ensure the continual improvement of our OHS program and Documented Management System.

We will review our policy periodically to ensure its adequacy and suitability and we will communicate this policy to all employees and interested parties. We believe that our employees are our greatest asset and its part of our policy to ensure that everyone is aware of his vital role for the continual development of their welfare within our company by participating in our periodic scheduled training programs. We expect in return that our employee performs his tasks in a safe and responsible manner and the organization will do its utmost best to provide the necessary means for protection.

Employees, stake holders, neighbors and those who work with us are encouraged to participate and discuss concerns in a transparent way and to take part in the continuous improvement programs through the available communication methods.

FD is committed to full compliance to all requirements of ISO 14001:2015 & ISO 45001:2018.
